Java FX on ARM

Inhaltsverzeichnis

1   Dir Structure

2   Remote Desktop

2.1   Remote Windows 10

Public Port 3389
mstsc.exe or Windows (Kachel) App
Remote Desktop Linux

2.2   Remote Linux

Always use x2goserver CommandPrompt or published applications
needs xterm

x2go uses .desktop files at /etc/x2go/applications
Automatically created link
        /etc/x2go/applications -> /usr/share/applications

Public Port 22 (not more)

2.2.1 Remote Desktop Debian

Network Install
Final Install Selection: No Desktop environement

        apt install x2goserver
        apt install xterm

2.2.2 for chrome-os

        apt install mlterm
(xterm terminates suddenly after)

2.2.3 CentOS 7 ok

        yum check-update
        yum update
        yum -y install epel-release
        yum info epel-release
        yum repolist
        yum install x2goserver (kein x2goserver-xsession)
        yum install xterm

Works on CentOS 7; Dont Go on CentOS 8.1 and 8.2
comman: yum install x2goserver … makes failure

3 Network access

3.1 Nfs

apt install nfs-common

3.2 smb

apt install cifs-utils
mount -t cifs //qnap/<share> -o user=root,password= /mnt
